

Core Facility SQUARE

W. Cools

2024-01-02

The core facility SQUARE provides an in-house service to the researchers at VUB - UZ Brussel. Methodological and statistical support to help make a difference !

Our SQUARE github page is used primarily to occasionally share code and solutions for exercises in workshops.

For more details on us, and for more resources we offer, best visit the SQUARE website

Mission: At SQUARE we meet to provide complementary support in statistics and methodology (qualitative and quantitative) to our research community, for individual researchers and research groups, in order to get the best out of their research. SQUARE aims to further enhance the quality of both the research and how it is communicated.

Vision: At SQUARE we are committed to be an integral part of research performed throughout VUB - UZ Brussel, a service known by all and used by those that could benefit from it.
